   **Audio and video** access points do not need to be on the same device (i.e. you can use a laptop or desktop for video, and use your cell phone for audio).

   If you hear an echo or feedback it means you have joined with two audio sources (phone and computer). Make sure you mute yourself in both places if this occurs. Using the **Call me at** feature eliminates this.

Mute or Unmute Yourself

To mute or unmute yourself, click **Mute** or **Unmute**.

- **Use computer audio** (default)—Use your computer with a headset or speakers.
- **Call me**—Enter a phone number and Webex calls you. Depending on your host's Webex plan, you may or may not see this option.
- **Call in**—If you prefer to use your phone for audio, dial in when the meeting starts. A list of the global call-in numbers is available in your meeting invite. Choose this option if your Internet connection is slow.

Use the “**side by side**” view for optimal viewing of the presenter and content. Access these options by choosing **Layout** in the upper right corner of your screen. While using Side-by-Side View or Floating View, click to switch the focus between the shared content and the video of the active speaker.

To get **Full Screen** view:

- click on the X in the upper right corner of your screen, OR
