HOW TO GET ON PIEDMONT LINK:

1. Go to https://www.piedmont.org/medical-professionals/for-physicians/piedmont-link
2. Scroll to the bottom of the screen and click “Request Access”
3. Select the new group type that best matches your group under New Account Request

Complete all information you can.

- Information is required and the request cannot be submitted without this information.
- Information is not required but recommended if applicable to your office.

Once you have filled out all the information related to your group click

4. Add any users you want associated with your group based on the access type you would like them to have.

Note: You must mark at least one user as Site Administrator by checking the box at the bottom of the form that says “Make this user a site administrator” – this gives the user permission to add additional users moving forward, remove users that no longer need access and update some user passwords, among other things.

Once you have completed the form for your user click and select your next user type.

5. Once you have added all of your users and providers click

6. Complete the verification screen and click

IMPORTANT!!

Physicians offices: Please add any providers that you want associated with your group by selecting the Provider user type. If they do not need Piedmont Link access there is a place in the form to note that. Patients are added to your patient list based on the providers associated with your group so it is important to list those for integration purposes.

NEXT STEPS:

Once your access is built, you will receive an email with your log in and training information. Be sure to attend a training to learn how to meet the other measure for Network Management and the MS CGC.
